

Professional Summary

Software Developer with hands-on experience building and optimizing web applications through professional internships and independent projects. Experienced in developing **reliable backend and real-time systems**, solving performance and integration challenges, and collaborating to deliver practical software solutions. Interested in **systems, networking, and emerging technologies** beyond traditional application development.

Education

B.Tech Artificial Intelligence and Data Science
Erode Sengunthar Engineering College

Technical Skills

Languages	Python, Java, JavaScript, C#
Frontend	React, HTML, CSS, Bootstrap, Tailwind CSS
Backend	Django, Django REST Framework
Databases	PostgreSQL, MySQL
Testing	Manual Testing, Automation Testing, Test-Driven Development (TDD)
Developer Tools	Git, GitHub, Postman, JMeter, VS Code

Experience

Full Stack Developer Intern
Altruisty Innovation Private Limited, Chennai
Developed a real-time online learning platform for course management, and student engagement.

Jan 2025 – Jul 2025

- Developed a **real-time learning platform** using **Python, Django, and PostgreSQL**, improving velocity by **30%**.
- Optimized **backend modules and database queries**, reducing response time by **25%** and improving performance.
- Automated **attendance and monitoring workflows**, reducing manual effort by **80%** while improving efficiency.
- Collaborated with cross-functional teams using **Git**, reducing merge conflicts by **40%** and improving consistency.

Projects

Devlan [link]
A developer platform for local Git repository management and AI-assisted development.

React, Django REST Framework, GitPython, Ollama

- Developed a web-based platform for managing, browsing, and collaborating on Git repositories.
- Engineered **bare repository architecture** and configured **Git Smart HTTP** to support remote cloning and push workflows.
- Built repository tree browsing and Git workflow APIs for **commits, branches, cloning, pushing, and pulling**.
- Integrated **local AI with Ollama** and built REST APIs for repository management and AI-assisted development.

Collab Platform [link]
Real-time project management platform featuring GitHub integration, communication, task management.

React, Django REST Framework, Django Channels

- Built a **real-time project platform** using **React, Django, and WebSockets**, enabling seamless team collaboration.
- Implemented **JWT authentication**, GitHub OAuth, and role-based access controls for secure project management.
- Built **WebSocket-powered group chats** with typing indicators and offline message caching for real-time collaboration.
- Integrated **GitHub APIs** for repository creation, commit tracking, pull requests, and issue management.

Other Projects

Home Lab & Network Infrastructure
Self-hosted infrastructure for application deployment, file sharing, remote access, and multi-device communication.

Linux, Networking, Samba, SSH, DLNA, Cloudflare Tunnel

- Configured a **Linux-based home server** for application deployment, centralized storage, and multi-device access.
- Implemented **Samba and SSH** for network file sharing and remote server administration.
- Deployed applications to the internet using **Cloudflare Tunnel**, enabling secure public access without exposing the home network directly.

Areas of Interest

- Gaming Technology & Game Mechanics
 - Space & Astrophysics
- Computer Networking & Device Communication
 - Theoretical Physics & Relativity
